Fictional roster. Not a fitness-to-play decision.

# Lineup Card

Fictional Triple-A Club · 2026-09-20 · vs Lakeside Fictionals (away) · reviewed by M. Castillo (example review)

## Check in today

1. **J. Ortega** RP · Check in
   Jump 17% below his normal · wellness low · 196 throws + pitches in 7 days
2. **C. Duvall** RP · Watch
   Jump 11% below his normal · 185 throws + pitches in 7 days

## Today's players

Jump today compared with his own normal (scale: 20% lower to 20% higher). Dot = today. Centre line = his normal. Shaded area = his usual ups and downs. A dot left of the shading means he is jumping lower than usual.

Starters

| | | |
|---|---|---|
| A. Whitcomb SP |  | No change<br>9% above his normal |

Catchers

| | | |
|---|---|---|
| M. Daley C |  | No change<br>Right at his normal |

Infield

| | | |
|---|---|---|
| F. Quintero IF |  | No change<br>3% below his normal · wellness low<br>Changed to No change: Tested 20 minutes after treatment; retest tomorrow |

| | | |
|---|---|---|
| J. Mabry IF |  | No change<br>12% above his normal |
| W. Thorne IF |  | No change<br>4% below his normal |
| I. Novak IF |  | No change<br>5% above his normal |

Outfield

| | | |
|---|---|---|
| D. Achebe OF |  | No change<br>7% below his normal |
| T. Brandt OF |  | No change<br>1% below his normal |
| T. Gallagher OF |  | No change<br>4% below his normal |
| M. Serrano OF |  | No change<br>10% above his normal |

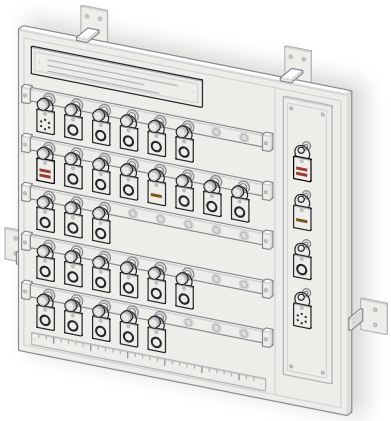

18 others not listed today. 2 flagged: J. Ortega (RP), C. Duvall (RP).

## Two-week trend

J. Ortega

C. Duvall

## Availability board

Board: one peg per player. Two bars = Check in, one bar = Watch, ring = No change, dashed ring = Not enough data.

**How a flag works:** a player is flagged only when his drop is big compared with his own last 28 days and bigger than normal test-to-test noise. Team and league notes are context only. Coaches and medical staff decide who plays.
**Jump** = reactive strength from the force-plate jump (RSI-mod). **Sources:** VALD ForceDecks, Catapult (load, throws, pitches), morning wellness form. Fictional roster and data. For context only: a typical jump score at this level is about 0.52 m/s (illustrative, not a published MLB or MiLB norm).
